

FRUIT FLY INFORMATION SESSION

Wednesday, 7th March, 7-9 pm

- Queensland fruit fly is a serious indigenous pest occurring throughout eastern Australia
- It may already have reached the Yarra Valley area
- It infests both indigenous and introduced fruits – from tomatoes to citrus.

Free information session

The Chum Creek Landcare Group, in association with the Northern Yarra Landcare Network, invites all fruit growers to learn about fruit flies in a short evening session given by Bronwyn Koll.

The Victorian government has recently appointed Bronwyn as the Fruit Fly Regional Coordinator in the Yarra Valley to help protect horticultural production and keep the area fruit fly free. Bronwyn is responsible for implementing the Yarra Valley Fruit Fly Regional Action Plan that was developed collaboratively by industry, government and community in the area. Bronwyn's talk will include –

- How to recognise the presence of the fruit fly;
- How to minimise the likelihood of its presence;
- Appropriate fruit-growing and fruit-tending practices.

When : Wednesday 7th March , 7-9pm - light refreshment provided

Where: Chum Creek Primary School (705 Chum Creek Road, Melways ref 269 C3)

RSVP: email chumcklandcare@gmail.com or call 5962 5227
